

Recognised for "Care"

Peter Gibson

I would like to nominate Peter Gibson in recognition of his outstanding work with SCom alerting and Base24. Peter has demonstrated strong ownership, technical expertise, and a clear commitment to supporting critical systems that help keep our services stable, reliable, and safe for customers and colleagues. His work with SCom alerting has improved visibility of system health and enabled earlier identification and response to issues, helping reduce operational risk and support better service outcomes. His contribution to Base24 has also been invaluable, particularly given the importance of this platform to payments and customer-facing services. Peter's work strongly reflects Bankwest's values and purpose. By improving alerting, strengthening operational resilience, and supporting a key banking platform, he is helping make banking simpler, smarter, and more dependable for our customers. His focus on doing the right thing, working collaboratively, and delivering practical improvements demonstrates a strong customer-first mindset and a genuine commitment to quality. From a risk perspective, Peter's efforts have helped improve control, monitoring, and responsiveness across important technology services. Effective alerting and reliable platform support are critical in reducing the likelihood and impact of incidents, protecting customer experience, and supporting safe and secure banking operations. Peter approaches this work with care, accountability, and professionalism, ensuring risks are considered and managed rather than simply reacting when issues arise. Peter consistently goes above and beyond, brings a calm and solutions-focused approach, and makes a meaningful contribution to the team and the wider organisation. I believe he is highly deserving of this nomination.
